

## FLOWBOX aluminum frame

Experience maximum precision and cleanliness with our Flowbox, the ideal upgrade for any workbench. Framed by an elegant aluminum frame, this flowbox meets the strict requirements of a cleanroom up to ISO 14644 class 5, thanks to the powerful HEPA 14 main filter. With an operating noise that ranges from a very quiet 36dB to 45dB, you can concentrate on your work in a low-noise environment. In addition, it offers a modular choice of colors and sizes so that it fits perfectly into any workspace and adapts to your individual needs.

Design your workspace with a flowbox that is not only functional, but also adaptable and stylish.
