

FLOWBOX glass frame

This flowbox with its three sides made of UV-bonded Securit glass meets the requirements of a cleanroom up to ISO 14644 class 5. Equipped with a HEPA 14 main filter, it ensures maximum air purity while remaining extremely quiet in operation with a noise level of just 36dB to 45dB. In addition, it offers a modular choice of color and size to fit seamlessly into any workspace. This flowbox is the ideal solution for working environments that demand the highest standards of cleanliness and quietness.
