

UNIQUE I

Made to individual specifications, the "UNIQUE I" watchmaker's table shines with its rustic yet sublime appearance.

The table, which is height-adjustable using a convenient crank operation, is made of solid oak and finished with an elaborate lacquer. A three-sided upstand and groove milling in the front area of the table top serves to catch small parts. An integrated cable duct and a main switch for the electrical system make it easy to work comfortably and clearly.
